Today’s complex academic medicine and healthcare environment needs women leaders at the forefront.

The Time has Come…

- A community of 400 women leaders in academic medicine and healthcare
- A day of networking, connection and learning
- Exposure to deep skills training sessions on competencies required to drive results
- Powerful keynote speakers that inspire

Co-produced by the University of Michigan Medical School
THE NEED

Women are not advancing to leadership roles fast enough to meet the current and future needs in healthcare and academic medicine. Smart organizations recognize that without an adequate supply of highly skilled, experienced women advancing into leadership, they will fail.

THE EXPERIENCE

Networking and Connection—World Café Style

Leaders credit relationship building as most critical to their advancement, yet many women don’t take the time to build their network. The World Café is a proven approach for fostering authentic dialogue and creating dynamic networks of conversation around a community’s real work and critical questions—improving relationships and people’s capacity to shape the future together.

Skill Development

Participants will experience accelerated growth through integrated skills-based training, connecting critical thinking and relational leadership skills with top thought leaders and a world class faculty. This year’s Summit skill sessions are built on this reality: Women who advance are skilled negotiators who navigate conflict well, and have powerful and purposeful presence. All Summit participants will experience:

Skill Session: Negotiating Conflict

• How to conduct negotiations in a way that builds healthy and productive internal and external relationships.
• Strategies for negotiating up and dealing with senior decision makers and influencers.
• Tools to prepare, conduct, and analyze negotiation results so that they can continuously improve.

Skill Session: Leadership Presence

• Effective relationship building skills necessary to drive individual and team development.
• Techniques for developing an authentic and compelling leadership presence.
• Learn the elements of the PRES model, and how they help leaders show up more effectively.

Inspiring Keynote Presenters

AMY CUDDY
The Harvard Business School Professor: Dr. Amy Cuddy is a social psychologist and Associate Professor at Harvard Business School. Her latest research illuminates how “faking” body postures that convey competence and power (“power posing”)—even for as little as two minutes—changes our testosterone and cortisol levels, increases our appetite for risk, causes us to perform better in job interviews, and generally configures our brains to cope well in stressful situations.

PAULA JOHNSON
Recipient of The Outstanding Women Leader in Healthcare award: Paula A. Johnson, M.D., M.P.H., is the Executive Director of the Mary Connors Center for Women’s Health and Gender Biology and Chief of the Division of Women’s Health at Brigham and Women’s Hospital (BWH), where she is responsible for developing interdisciplinary research, education, and clinical programs in women’s health. Dr. Johnson is a women’s health specialist and a pioneer in the treatment and prevention of cardiovascular disease. She conceived of and developed one of the first facilities in the country to focus on heart disease in women.

Tuition

Individual: $525/person
Groups of 10 or more: $450/person
Early bird pricing: $495 by December 31, 2014
